DETAILED ACTION

Allowable Subject Matter

1. Claims 1-3 are allowed.
2. The following is an examiner's statement of reasons for allowance: the primary reason for allowance of the claimed invention is the inclusion of the logic circuit (40 of Fig. 1) for outputting N bits data based on a matching being made between the high-bit data and the low-bit data, wherein: if the matching stands between the high-bit data and the low-bit data, the N-bit data is outputted in accordance with predetermined conditions; and if the matching does not stands in-between the high-bit data and the low-bit data, the high-bit data is modified according to the low-bit data, and the N-bit data is outputted in accordance with predetermined conditions. The best prior art of record (see the cited references) does not teach or suggest an ADC type of claim 1 including the logic circuit. Therefore, claims 1-3 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
